The global Medical Linen Rental Service market size is predicted to grow from US\$ 4628 million in 2025 to US\$ 5892 million in 2032; it is expected to grow at a CAGR of 3.5% from 2026 to 2032.

Medical Linen Rental Service is a professional outsourced service model for medical and healthcare institutions, in which a specialized third-party supplier provides full-cycle supply, rental, collection, washing, disinfection, sterilization, maintenance, replacement and distribution of standardized medical linen.

Medical linen refers to all reusable textile supplies used in medical scenarios: hospital bed sheets, quilt covers, pillowcases, patient gowns, surgical gowns, drape cloths, nurse uniforms, isolation gowns, operating room cloths, ward towels, etc.

The global medical linen rental service market is in a robust growth phase, driven by healthcare outsourcing trends, infection control demands, and significant private equity investment activity.

Several fundamental factors are fueling the global expansion of this industry:

Outsourcing of Non-Core Functions: Hospitals and healthcare facilities are increasingly outsourcing linen services (laundry, rental, management) to focus resources on core patient care. This shift is a primary growth engine for the market.

Heightened Focus on Infection Control: The demand for professionally laundered, hygienically safe linens has never been higher. Rental service providers offer standardized, certified cleaning processes that are difficult and costly for individual

hospitals to replicate in-house .

Adoption of Sustainable Practices: The industry is benefiting from a push towards sustainability. Rental models promote the use of durable, reusable textiles over single-use options, reducing medical waste. Additionally, laundry technologies are advancing to be more energy and water-efficient.

Cost-Effective Solutions: Rental services help healthcare providers convert high capital expenditures (for purchasing linens and laundry equipment) into predictable, lower operational expenses, improving financial efficiency.
