The global Medical Micro-hyperbaric Oxygen Chamber market size is predicted to grow from US\$ 123 million in 2025 to US\$ 226 million in 2032; it is expected to grow at a CAGR of 9.3% from 2026 to 2032.

Medical micro-hyperbaric oxygen chambers are the carriers of micro-hyperbaric oxygen therapy. It uses ultrasonic technology to enhance human functions and is a new type of treatment system. Specifically, the medical micro-hyperbaric oxygen chamber generates micro-hyperbaric oxygen (oxygen partial pressure $\geq 100\text{kPa}$), forming a high-pressure environment greater than atmospheric pressure in a closed cavity, thereby forcing oxygen into the blood and increasing the amount of dissolved oxygen. This process can effectively promote blood circulation, increase blood oxygen saturation, enhance cardiopulmonary function, and help improve human health, accelerate the elimination of toxins in the body, and repair damaged organs.

The application scope of micro-hyperbaric oxygen chambers is constantly expanding, from the initial medical use to gradually penetrate into health care, beauty, sports rehabilitation and other fields. Among them, the field of sports recovery is one of the main application areas of micro-hyperbaric oxygen chambers, occupying a large market share. With the improvement of health awareness and the arrival of an aging society, the demand for micro-hyperbaric oxygen chambers among chronic disease patients and the elderly is also increasing. At the same time, the trend of portability and home use of micro-hyperbaric oxygen chambers also makes them easier to use at home and carry with you, meeting the needs of individuals and small clinics. It is expected that in the next few years, with the continuous advancement of technology and the continuous expansion of the market, the medical micro-hyperbaric oxygen chamber market will maintain a rapid growth trend. At the same time, with the continuous increase in

people's demand for health care, the application of micro-hyperbaric oxygen chambers in the field of health care will also be more extensive.
