Medical practice management software (PMS) is a category of healthcare software that deals with the day-to-day operations of a medical practice. Such software frequently allows users to capture patient demographics, schedule appointments, maintain lists of insurance payors, perform billing tasks, and generate reports.

A significant driver in the Medical Practice Management Software (PMS) market is the growing adoption of digital solutions for healthcare administration and patient management. PMS software offers healthcare providers the ability to streamline their practice operations, including appointment scheduling, billing, electronic health records

(EHR) integration, and financial management, leading to improved efficiency and patient care. However, a notable challenge in this market is the need for data security and compliance with healthcare regulations. Ensuring that patient data is protected and that PMS systems meet stringent regulatory requirements poses a significant challenge.
