Medicinal Gelatin Soft Capsules are a type of soft gelatin capsule that contain one or more active pharmaceutical ingredients (APIs) and are used for oral administration. The gelatin shell of the capsule is typically made from animal-derived materials and is filled with a liquid or semi-solid formulation containing the API(s) and other excipients. These capsules are commonly used to deliver a wide range of medications, including vitamins, minerals, herbal supplements, and prescription drugs. The soft gelatin shell allows for easy swallowing and may also provide improved bioavailability of the drug compared to other dosage forms.

The global pharmaceutical market is 1475 billion USD in 2022, growing at a CAGR of 5% during the next six years. The pharmaceutical market includes chemical drugs and biological drugs. For biologics is expected to 381 billion USD in 2022. In comparison, the chemical drug market is estimated to increase from 1005 billion in 2018 to 1094 billion U.S. dollars in 2022. The pharmaceutical market factors such as increasing demand for healthcare, technological advancements, and the rising prevalence of chronic diseases, increase in funding from private & government organizations for development of pharmaceutical manufacturing segments and rise in R&D activities for drugs. However, the industry also faces challenges such as stringent regulations, high costs of research and development, and patent expirations. Companies need to continuously innovate and adapt to these challenges to stay competitive in the market and ensure their products reach patients in need. Additionally, the COVID-19 pandemic has highlighted the importance of vaccine development and supply chain management,

further emphasizing the need for pharmaceutical companies to be agile and responsive to emerging public health needs.
