The global Medium-altitude Long-endurance UAV (MALE UAV) market size is predicted to grow from US\$ 5395 million in 2024 to US\$ 8806 million in 2030; it is expected to grow at a CAGR of 8.5% from 2024 to 2030.

A medium-altitude long-endurance UAV (MALE UAV) is an unmanned aerial vehicle (UAV) that operates at an altitude of between 10,000 and 30,000 feet (3,000–9,000 m) over prolonged periods of time, usually between 24 and 49 hours. Unmanned aerial vehicles are often referred to as drones that are employed without a human pilot onboard as aircraft structures.

As the technology of MALE UAV is not relatively mature, the downstream market, especially for defense market is growing fast, there are few of enterprises in the MALE UAV market. The more advance MALE UAV is mainly produced in United States and Israel because their higher R&D level, while MALE UAV produced in China are catching the eyes worldwide due to its high cost performance. The MALE UAV market competition will be still intense. General Atomics is the leading manufacturer in the global MALE UAV market with the market share of 37%, in terms of revenue, followed by AVIC, Israel Aerospace Industries, CASC, Airbus and other players. The top 5 listed companies accounted for 76% of the market share.

MALE UAV is widely adopted across the world, as the drones have been used for a multitude of applications, including intelligence, surveillance and reconnaissance (ISR) operations, surveillance to counter problems such as terrorism, smuggling, piracy, forest fires, as well as illegal logging and fishing, etc. Among them, ISR segment accounted

for the most of market share, in terms of revenue. Medium Altitude/Long Endurance (MALE) UAVs like the Predator and Heron. With an endurance of about 24 hours and long-range capability these are generally used for operational reconnaissance. In addition, missions include surveillance to counter problems such as terrorism, smuggling, piracy, forest fires, as well as illegal logging and fishing. Briefly speaking, in the next few years, MALE UAV industry will still be an energetic industry.
