Medium molecular weight polyisobutylene's average molecular weight ranges between 40,000 and 120,000 g/mol. Medium molecular weight polyisobutylene is employed as viscosity modifier, tack improver in adhesive formulations, and primary binder in caulking and sealing compounds. It is also used in fuel and lubricating oil additives. It is extensively used as a protective barrier in the adhesive industry. For instance, it is used where exposure to sunlight is a potential risk for sealants. Medium molecular weight polyisobutylene is employed in insulating glass sealants and roofing membranes in the construction industry. Furthermore, it is used in protective films or acoustic barriers in the automotive industry. Medium molecular weight polyisobutylene is also an essential ingredient in the production of chewing gums.

The global medium molecular weight polyisobutylene (MMW PIB) market is experiencing steady growth, driven by its versatile applications across various industries. In the automotive sector, MMW PIB is utilized in lubricants and fuel additives to enhance engine performance and fuel efficiency. Its excellent adhesive properties and chemical resistance make it a preferred choice in the construction industry for sealants and waterproofing materials. Additionally, MMW PIB finds applications in the pharmaceutical and personal care industries due to its biocompatibility and stability. The

increasing demand for high-performance materials in these sectors is propelling the market forward.

Regionally, Asia-Pacific leads the market, fueled by rapid industrialization and growth in automotive and construction activities in countries like China and India. North America and Europe also contribute significantly, with established automotive and manufacturing sectors. However, the market faces challenges such as fluctuating raw material prices and stringent environmental regulations. Despite these hurdles, ongoing research and development efforts aimed at improving production processes and expanding application areas are expected to sustain the market's growth trajectory in the coming years.
