The global Medium and Low Power Laser Cutting Machine market size is predicted to grow from US\$ 2380 million in 2025 to US\$ 4520 million in 2032; it is expected to grow at a CAGR of 9.6% from 2026 to 2032.

In 2025, global sales of Medium and Low Power Laser Cutting Machine reached 76,000 units, with an average selling price of US\$32,000. Medium and Low Power Laser Cutting Machines typically refer to industrial laser processing equipment with laser power in the range of 500W–6000W. They are mainly used for precision cutting of thin sheet metal and non-metal materials, and feature low energy consumption, fine kerf, high degree of automation, and controllable overall cost. They are widely used in sheet metal processing, home appliances, 3C electronics, automotive parts, construction machinery, and advertising signage industries. Its upstream raw materials and core components include fiber lasers, CNC systems, linear guides, servo motors, machine tool beds, and electrical components. On average, a single unit consumes approximately 6.5 tons of structural steel, one set of fiber lasers, approximately 180 kg of CNC and servo systems, and 120 kg of electrical components. Downstream, it mainly supplies small and medium-sized metal processing enterprises and complete machine manufacturers, with sheet metal processing accounting for 40%, home appliances and 3C products accounting for 30%, automobile and machinery manufacturing accounting for 20%, and others accounting for 10%. The global total production capacity is approximately 120,000 units/year, and the industry's average gross profit margin is approximately 25%-35%. In terms of downstream consumption, new capacity and equipment upgrades account for 65%, while replacement of existing equipment accounts for 35%. The future lies in developing towards higher cutting precision, more intelligent control systems, and integrated automatic loading and unloading. Against the backdrop of digital transformation in manufacturing, increased automation needs of

SMEs, and cost substitution for traditional punching and shearing processes, the market demand for Medium and Low Power Laser Cutting Machines continues to grow, presenting business opportunities for both large-scale production and structural upgrades.
