Medium Pressure Injection Moulding (MPIM) machines are designed for moulding of ceramic, metal and intermetallic (tungsten carbide) feedstocks, primarily using wax-based binders. These table top units are compact, flexible and service-friendly and are constructed for durable large scale, fully automatic production, as well as for short series in semi-automatic or manual mode. The clamping force of 201-500 ton-force is mainly used in medium-sized injection molding machines. Machine types such as hydraulic, all-electric, and hybrid are available in 201-500 ton-force. These machines are mainly used for applications in the automotive, packaging, and consumer goods industries, where relatively medium-sized molded parts are required.
