The global MEMS Automobile Sensors market size is predicted to grow from US$ 6513 million in 2025 to US$ 8821 million in 2031; it is expected to grow at a CAGR of 5.2% from 2025 to 2031.

Physical MEMS sensors are the most commonly used sensors in automobiles, and are mainly used in safety systems, anti-lock braking systems (ABS), engine systems, driving navigation, vehicle monitoring and self-diagnosis. At present, the leading products in the automotive MEMS sensor market are pressure sensors, accelerometers, micro gyroscopes, chemical sensors, gas sensors and fingerprint recognition sensors.

Automotive is a key driver of this industry. According to data from the World Automobile Organization (OICA), global automobile production and sales in 2017 reached their peak in the past 10 years, at 97.3 million and 95.89 million respectively. In 2018, the global economic expansion ended, and the global auto market declined as a whole. In 2022, there will wear units 81.6 million vehicles in the world. At present, more than 90% of the world's automobiles are concentrated in the three continents of Asia, Europe and North America, of which Asia automobile production accounts for 56% of the world, Europe accounts for 20%, and North America accounts for 16%. The world major automobile producing countries include China, the United States, Japan, South Korea, Germany, India, Mexico, and other countries; among them, China is the largest automobile producing country in the world, accounting for about 32%. Japan is the world's largest car exporter, exporting more than 3.5 million vehicles in 2022.
