Date: October 2026
Pages: 161
Price: US$ 3,660.00 (Single User License)
ID: G2331B093D90EN

Abstracts

The global Mercury Continuous Emission Monitoring System market size is predicted to grow from US$ 199 million in 2025 to US$ 276 million in 2032; it is expected to grow at a CAGR of 4.6% from 2026 to 2032.

In 2025, global Mercury Continuous Emission Monitoring System production reached approximately 3,973 units with average price of 51,240 USD/Unit.

A Mercury Continuous Emission Monitoring System is a dedicated automated monitoring system installed on industrial stacks, ducts, or other stationary-source exhaust channels to continuously measure vapor-phase mercury concentrations and emission rates. A typical system consists of a sampling probe, heated sample line, particulate filter, mercury-speciation conversion unit, sample-conditioning system, mercury analyzer, calibration equipment, and a data acquisition and handling platform. Because mercury in flue gas may occur as elemental mercury and oxidized mercury, the system generally converts different vapor-phase mercury species into a common measurable form through thermal conversion, catalytic treatment, or chemical reduction. Measurement is then performed using technologies such as cold-vapor atomic absorption, cold-vapor atomic fluorescence, or Zeeman background-corrected atomic absorption. The system is used for compliance monitoring, abnormal-emission detection, evaluation of mercury-control equipment, emission accounting, and process optimization.

The upstream segment includes ultraviolet light sources, low-pressure mercury lamps, atomic-absorption and atomic-fluorescence detectors, photomultiplier tubes, optical filters, reaction chambers, catalytic conversion materials, sample pumps, solenoid valves, filters, heated sample lines, mercury calibration generators, flow controllers, and

info@marketpublishers.com

industrial computers. Mercury-conversion units, low-concentration detection modules, and calibration systems are particularly important because they determine measurement accuracy, detection limits, response time, and long-term stability. The midstream consists of mercury-analyzer manufacturers, complete-system suppliers, environmental engineering integrators, software providers, and third-party operation and maintenance companies. These participants undertake system design, equipment integration, installation, commissioning, certification testing, quality assurance, and remote maintenance. Major downstream users include coal-fired power plants, industrial boilers, municipal and hazardous-waste incinerators, cement clinker plants, non-ferrous metal smelters, steel-sintering facilities, and other industries processing mercury-containing fuels or raw materials. Recurring revenue is also generated from calibration services, catalyst and filter replacement, sample-line cleaning, comparison testing, data validation, spare parts, and long-term maintenance contracts.

The market for mercury continuous emission monitoring systems is expected to be driven by global mercury-control policies, stricter industrial emission limits, broader monitoring requirements, and replacement of aging installed systems. The Minamata Convention on Mercury requires participating countries to control mercury emissions from major source categories, including coal-fired power plants, industrial boilers, waste-incineration facilities, cement clinker production, and certain non-ferrous metal smelters. In the United States, the Mercury and Air Toxics Standards and dedicated quality-assurance procedures continue to support compliance monitoring and replacement demand in the power sector. In China, the introduction of a national technical standard for automated vapor-phase mercury monitoring systems, effective from April 15, 2026, is expected to support a gradual transition from intermittent manual testing toward standardized online monitoring.

Future growth opportunities are likely to be concentrated in waste incineration, hazardous-waste treatment, cement-kiln co-processing, non-ferrous metallurgy, and coal-fired industrial boilers. Low mercury concentrations, high moisture and dust levels, and interference from sulfur dioxide, chlorides, and other flue-gas components will increase demand for more efficient mercury conversion, lower detection limits, automated calibration, intelligent blowback, and remote diagnostics. However, market expansion may be constrained by relatively high system costs, adsorption losses in sampling lines, complex converter maintenance, strict calibration-source requirements, and the absence of mandatory continuous mercury monitoring in some jurisdictions. Future competition is therefore expected to focus not only on analyzer sensitivity, but also on complete-system reliability, data availability, low-maintenance design, and lifecycle service capability.

Report Scope

LP Information, Inc. (LPI) ' newest research report, the “Mercury Continuous Emission Monitoring System Industry Forecast” looks at past sales and reviews total world Mercury Continuous Emission Monitoring System sales in 2025, providing a comprehensive analysis by region and market sector of projected Mercury Continuous Emission Monitoring System sales for 2026 through 2032. With Mercury Continuous Emission Monitoring System sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US$ millions of the world Mercury Continuous Emission Monitoring System industry.

This Insight Report provides a comprehensive analysis of the global Mercury Continuous Emission Monitoring System landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Mercury Continuous Emission Monitoring System portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms’ unique position in an accelerating global Mercury Continuous Emission Monitoring System market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Mercury Continuous Emission Monitoring System and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Mercury Continuous Emission Monitoring System.

This report presents a comprehensive overview, market shares, and growth opportunities of Mercury Continuous Emission Monitoring System market by product type, application, key manufacturers and key regions and countries.

Segmentation by Type:

Total Gaseous Mercury CEMS (TGM)

Mercury Speciation CEMS (Hg?/Hg²?)

+357 96 030922
info@marketpublishers.com

Mercury and Multi-pollutant Integrated CEMS

Segmentation by Measurement Method:

Fully Extractive Hg-CEMS

Dilution Extractive Hg-CEMS

In-situ CEMS

Segmentation by Fluorescence:

Cold Vapor Atomic Fluorescence Spectroscopy (CVAFS)

Cold Vapor Atomic Absorption Spectroscopy (CVAAS)

Zeeman Atomic Absorption Spectroscopy

Others

Segmentation by Application:

Coal-fired Power Plants

Municipal Waste Incineration & Waste-to-Energy

Hazardous and Medical Waste Incineration

Cement Kilns

Non-ferrous Metal Smelting

Iron & Steel and Sintering Plants

Industrial Boilers and Chemical/Petrochemical Plants

Key Questions Addressed in this Report

+357 96 030922
info@marketpublishers.com

What is the 10-year outlook for the global Mercury Continuous Emission Monitoring System market?

What factors are driving Mercury Continuous Emission Monitoring System market growth, globally and by region?

Which technologies are poised for the fastest growth by market and region?

How do Mercury Continuous Emission Monitoring System market opportunities vary by end market size?

How does Mercury Continuous Emission Monitoring System break out by Type, by Application?

Contents

1 SCOPE OF THE REPORT

1.1 Market Introduction
1.2 Years Considered
1.3 Research Objectives
1.4 Market Research Methodology
1.5 Research Process and Data Source
1.6 Economic Indicators
1.7 Currency Considered
1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

2.1 World Market Overview
  2.1.1 Global Mercury Continuous Emission Monitoring System Annual Sales 2021-2032
  2.1.2 World Current & Future Analysis for Mercury Continuous Emission Monitoring System by Geographic Region, 2021, 2025 & 2032
  2.1.3 World Current & Future Analysis for Mercury Continuous Emission Monitoring System by Country/Region, 2021, 2025 & 2032
2.2 Mercury Continuous Emission Monitoring System Segment by Type
  2.2.1 Total Gaseous Mercury CEMS (TGM)
  2.2.2 Mercury Speciation CEMS (Hg?/Hg²?)
  2.2.3 Mercury and Multi-pollutant Integrated CEMS
  2.2.4 Mercury Continuous Emission Monitoring System Sales by Type
    2.2.4.1 Global Mercury Continuous Emission Monitoring System Sales Market Share by Type (2021-2026)
    2.2.4.2 Global Mercury Continuous Emission Monitoring System Revenue and Market Share by Type (2021-2026)
    2.2.4.3 Global Mercury Continuous Emission Monitoring System Sale Price by Type (2021-2026)
2.3 Mercury Continuous Emission Monitoring System Segment by Measurement Method
  2.3.1 Fully Extractive Hg-CEMS
  2.3.2 Dilution Extractive Hg-CEMS
  2.3.3 In-situ CEMS
  2.3.4 Mercury Continuous Emission Monitoring System Sales by Measurement

+357 96 030922
info@marketpublishers.com

Method
2.3.4.1 Global Mercury Continuous Emission Monitoring System Sales Market Share by Measurement Method (2021-2026)
2.3.4.2 Global Mercury Continuous Emission Monitoring System Revenue and Market Share by Measurement Method (2021-2026)
2.3.4.3 Global Mercury Continuous Emission Monitoring System Sale Price by Measurement Method (2021-2026)
2.4 Mercury Continuous Emission Monitoring System Segment by Fluorescence
2.4.1 Cold Vapor Atomic Fluorescence Spectroscopy (CVAFS)
2.4.2 Cold Vapor Atomic Absorption Spectroscopy (CVAAS)
2.4.3 Zeeman Atomic Absorption Spectroscopy
2.4.4 Others
2.4.5 Mercury Continuous Emission Monitoring System Sales by Fluorescence
2.4.5.1 Global Mercury Continuous Emission Monitoring System Sales Market Share by Fluorescence (2021-2026)
2.4.5.2 Global Mercury Continuous Emission Monitoring System Revenue and Market Share by Fluorescence (2021-2026)
2.4.5.3 Global Mercury Continuous Emission Monitoring System Sale Price by Fluorescence (2021-2026)
2.5 Mercury Continuous Emission Monitoring System Segment by Application
2.5.1 Coal-fired Power Plants
2.5.2 Municipal Waste Incineration & Waste-to-Energy
2.5.3 Hazardous and Medical Waste Incineration
2.5.4 Cement Kilns
2.5.5 Non-ferrous Metal Smelting
2.5.6 Iron & Steel and Sintering Plants
2.5.7 Industrial Boilers and Chemical/Petrochemical Plants
2.5.8 Mercury Production, Recycling and Remediation
2.5.9 Mercury Removal Process Control
2.5.10 Mercury Continuous Emission Monitoring System Sales by Application
2.5.10.1 Global Mercury Continuous Emission Monitoring System Sale Market Share by Application (2021-2026)
2.5.10.2 Global Mercury Continuous Emission Monitoring System Revenue and Market Share by Application (2021-2026)
2.5.10.3 Global Mercury Continuous Emission Monitoring System Sale Price by Application (2021-2026)

3 GLOBAL BY COMPANY

+357 96 030922
info@marketpublishers.com

3.1 Global Mercury Continuous Emission Monitoring System Breakdown Data by Company
3.1.1 Global Mercury Continuous Emission Monitoring System Annual Sales by Company (2021-2026)
3.1.2 Global Mercury Continuous Emission Monitoring System Sales Market Share by Company (2021-2026)
3.2 Global Mercury Continuous Emission Monitoring System Annual Revenue by Company (2021-2026)
3.2.1 Global Mercury Continuous Emission Monitoring System Revenue by Company (2021-2026)
3.2.2 Global Mercury Continuous Emission Monitoring System Revenue Market Share by Company (2021-2026)
3.3 Global Mercury Continuous Emission Monitoring System Sale Price by Company
3.4 Key Manufacturers Mercury Continuous Emission Monitoring System Producing Area Distribution, Sales Area, Product Type
3.4.1 Key Manufacturers Mercury Continuous Emission Monitoring System Product Location Distribution
3.4.2 Players Mercury Continuous Emission Monitoring System Products Offered
3.5 Market Concentration Rate Analysis
3.5.1 Competition Landscape Analysis
3.5.2 Concentration Ratio (CR3, CR5 and CR10) & (2024-2026)
3.6 New Products and Potential Entrants
3.7 Market M&A Activity & Strategy

4 WORLD HISTORIC REVIEW FOR MERCURY CONTINUOUS EMISSION MONITORING SYSTEM BY GEOGRAPHIC REGION

4.1 World Historic Mercury Continuous Emission Monitoring System Market Size by Geographic Region (2021-2026)
4.1.1 Global Mercury Continuous Emission Monitoring System Annual Sales by Geographic Region (2021-2026)
4.1.2 Global Mercury Continuous Emission Monitoring System Annual Revenue by Geographic Region (2021-2026)
4.2 World Historic Mercury Continuous Emission Monitoring System Market Size by Country/Region (2021-2026)
4.2.1 Global Mercury Continuous Emission Monitoring System Annual Sales by Country/Region (2021-2026)
4.2.2 Global Mercury Continuous Emission Monitoring System Annual Revenue by Country/Region (2021-2026)
