Mercury-free dental implants are made from zirconia, ceramic or titanium which is a bio-compatible, ceramic material. Zirconia completely assimilates (osseointegrates) into jaw bone without any signs of inflammation or foreign body rejection. Titanium implants are gray in color. of the titanium implants. Zirconia is white and therefore will not show thru thin tissue. Dental prosthetics are implants or dental fillers that facilitate bone formation and help in wound healing procedures in dental cavities due to tooth loss or tooth decays.
