The global Mesalamine market size is predicted to grow from US\$ 182 million in 2025 to US\$ 228 million in 2031; it is expected to grow at a CAGR of 3.8% from 2025 to 2031.

Mesalamine also known as mesalamine, or 5-aminosalicylic acid (5-ASA), is a medication used to treat inflammatory bowel disease, including ulcerative colitis and Crohn's disease. It is generally used for mildly to moderately severe disease. It is taken by mouth or rectally. The formulations which are taken by mouth appear to be similarly effective.

The global prevalence of IBD is rising, particularly in developed regions like North America and Europe, and increasingly in developing nations such as China and India. This increase is largely attributed to changes in lifestyle, dietary habits, and environmental factors, which are contributing to the growing demand for mesalazine.

With ulcerative colitis being the primary indication for mesalazine, the growing number of patients with this condition is directly driving market demand.

Global key players of Mesalamine are Syntese A/S, PharmaZell and Cambrex Corporation etc. The top 3 companies hold a share over 50%. The global Mesalamine are mainly produced in Europe and United States, they occupied for a share over 60%. Europe is the largest market, has a share about 43%, followed by Asia Pacific and North America, with share 31% and 12%, separately.
