The global Mesylate Safinamide market size is predicted to grow from US\$ 548 million in 2025 to US\$ 1452 million in 2032; it is expected to grow at a CAGR of 16.0% from 2026 to 2032.

In 2025, global safinamide mesylate tablet production reached approximately 321,700 units. Safinamide is a medication used to treat Parkinson's disease, primarily working by inhibiting monoamine oxidase B (MAO-B) and enhancing dopamine release. It helps regulate the dopamine system in the brain, alleviating motor symptoms in Parkinson's disease patients, such as tremors, rigidity, and bradykinesia. Safinamide is often used in combination with levodopa to enhance treatment efficacy, particularly when the effects of levodopa diminish. The medication is typically available in oral tablet form, and patients use it according to their doctor's guidance. During treatment, safinamide can significantly improve the patient's quality of life and reduce symptom fluctuations.

Safinamide holds an important position in the global Parkinson's disease treatment market, especially in improving motor symptoms in Parkinson's disease patients. With the aging population increasing, the number of Parkinson's disease patients globally continues to rise, providing a broad market demand for Safinamide. This drug works by inhibiting monoamine oxidase B (MAO-B) and enhancing dopamine release, alleviating symptoms in Parkinson's disease patients. When used in combination with levodopa, it significantly improves treatment outcomes and enhances the quality of life for patients. The market prospects for Safinamide are driven by several factors. Firstly, with the increase in early diagnosis of Parkinson's disease, the demand for effective medications among patients is growing. Secondly, Safinamide has strong competitiveness in the market, particularly among levodopa-resistant patient populations, where its use is gradually being recognized. However, there is still competition from other drugs such as dopamine agonists and anticholinergic medications, which results in a competitive market environment.
