The global Metal Base PCB market size is predicted to grow from US\$ 35370 million in 2025 to US\$ 49930 million in 2031; it is expected to grow at a CAGR of 5.9% from 2025 to 2031.

A Metal Base PCB, also known as Metal Core PCB (MCPCB), is a type of printed circuit board designed with a thermally conductive metal core as its base layer, typically made of aluminum or copper. This metal core provides excellent heat dissipation and thermal management capabilities, making Metal Base PCBs well-suited for applications that generate significant heat, such as high-power electronic devices and LED lighting systems.

LED Lighting Applications: The LED lighting industry has been a significant driver for the Metal Base PCB market. As LED technology continues to advance and replace traditional lighting sources, the demand for Metal Base PCBs with excellent thermal management capabilities remains strong. This trend is expected to continue, especially as energy-efficient lighting becomes more prevalent.

Automotive Electronics: The automotive industry increasingly relies on advanced electronics for safety, infotainment, and powertrain control. Metal Base PCBs are used in applications such as LED headlights, power electronics, and engine control units to ensure reliability and performance under high-temperature conditions. The automotive sector is expected to continue to drive demand for Metal Base PCBs.

High-Power Electronics: Various high-power electronic applications, including power supplies, motor drives, and renewable energy systems (e.g., solar inverters), have benefited from Metal Base PCBs. These applications require efficient heat dissipation,

and the trend towards more powerful and compact electronic devices is likely to boost the market.

Telecommunications and Data Centers: The telecommunications and data center industries demand reliable and high-performance electronic components. Metal Base PCBs are used in networking equipment, power amplifiers, and high-frequency applications where thermal control is essential. The expansion of data centers and 5G infrastructure is expected to drive growth in this segment.
