Chromium is a steel-gray, lustrous, and hard metal that finds wide use as a catalyst or in alloys. All chromium compounds have intense and varied colors. Chromium is used as a hardener in steel, for the manufacture of stainless steel and many useful alloys. It is also employed to give glass an emerald green color. Chromium does not oxidize in air, even in extreme moisture.

This report mainly studies chrome metal powder market. Chrome Metal Powder is a white grey powder and particle size less than 1mm. Thanks to its very high corrosion resistance against many different acids and bases as well as hot gases, Chrome Metal

Powder is a popular material for all types of protective coating.
