In 2025, global Metal Extrusion Press production reached approximately 500 units, with an average global market price of around 2 million dollars per unit. Metal Extrusion Press is a pressure forming process used in the manufacture of rods, pipes, wires as well as profiles, above all of aluminum, but can also be copper, copper alloys and other metals and alloys. With this process a billet is pressed through a die, which determines the external shape of the press train. The internal shape can be influenced by differently formed mandrels. With its unique power-density, the fact that no maintenance is required and high availability, hydraulics is ideally suited to the drive of the main axis of an Metal Extrusion Press.

The Metal Extrusion Press market is an integral part of the manufacturing industry, particularly in sectors that involve the production of metal and plastic products with uniform cross-sections. An Metal Extrusion Press market analysis examines various factors that influence the industry's growth, trends, challenges, and opportunities. The Metal Extrusion Press market size is influenced by the demand for extruded products across various industries, including construction, automotive, aerospace, and packaging. The market has been experiencing steady growth due to industrialization, urbanization, and infrastructure development, especially in emerging economies. Asia-Pacific is expected to account for the largest market share due to the presence of major manufacturing hubs in China, India, and Japan. North America is seeing steady growth due to the increasing demand for lightweight materials in the automotive industry and infrastructure projects. The market in Europe is mature but growing, driven by stringent

regulations on vehicle emissions and the push for sustainable construction materials. Latin America and Middle East & Africa are expected to grow at a moderate pace, driven by infrastructure development and industrialization. The integration of advanced automation and digital technologies is increasing the efficiency and precision of Metal Extrusion Presses.
