Metal skirting is a decorative strip installed at the junction of walls and floors. It is made of metals such as aluminum alloy and stainless steel. It is wear-resistant, impact-resistant, moisture-resistant, and fire-resistant. Its built-in clip-on structure and cable duct design allow for quick installation and concealed wiring. Its anodized or spray-coated surface protects the base of the wall while enhancing the modern feel of the space. In 2024, the global metal skirting market price was US$6 per meter, with sales of approximately 237,000 kilometers and an average annual production capacity of approximately 150,000 to 250,000 meters per line. The industry profit margin was 15% to 25%.

Upstream: aluminum/stainless steel coils, surface treatment agents (powder coatings, anodizing electrolytes), and plastic accessories (clip-ons and end caps). Downstream: residential renovation, commercial and public renovation, building materials retailers, and existing home renovation projects.
