Metal Scrap includes ferrous scrap and non-ferrous scrap. Ferrous Metal (Iron) and steel scrap, also referred to as ferrous scrap, comes from end of life products (old or obsolete scrap) as well as scrap generated from the manufacturing process (new, prime or prompt scrap). Obsolete ferrous scrap is recovered from automobiles, steel structures, household appliances, railroad tracks, ships, farm equipment and other sources. Nonferrous metals, including aluminum, copper, lead, nickel, tin, zinc, and others, are among the few materials that do not degrade or lose their chemical or physical properties in the recycling process. As a result, nonferrous metals have the capacity to be recycled an infinite number of times.

The major players in global metal waste and recycling market include Arcelormittal,

SIMS Metal Management, European Metal Recycling Limited, Chiho Environmental Group, OmniSource, etc. The top five players occupy over 8% shares of the global market. Europe is the largest producer, has a share about 27%, followed by China and North America, with share 26% and 20%, separately. The largest market is Europe, holds a share about 26%, followed by China and North America, with around 25% and 21% market share respectively.
