The global Metallized Polypropylene Film Capacitor market size is predicted to grow from US\$ 487 million in 2025 to US\$ 626 million in 2031; it is expected to grow at a CAGR of 4.3% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Metallized polyester film capacitors provides excellent self-healing properties, allowing capacitors to withstand high-pulsed voltages without breaking the dielectric. Polypropylene film capacitors provide very low loss, low dielectric absorption, and high dielectric strength. They also offer very high insulation resistance and negative temperature coefficient. This report focus on Metallized Polypropylene Film Capacitor market.

Factors such as high demand for film capacitor in consumer electronics components, rise in demand for high temperature film capacitors, and adoption of nanolayer film capacitors drives the growth of the film capacitor market. However, increase in severity of environmental and manufacturing rules and low pricing margin hamper the film capacitor market growth. Furthermore, higher adoption of film capacitor in electric vehicle system and technological advancements offer lucrative opportunities for the market growth.
