## Abstracts

The global Metallocene HDPE market size is predicted to grow from US\$ 8884 million in 2025 to US\$ 13987 million in 2032; it is expected to grow at a CAGR of 6.7% from 2026 to 2032.

Metallocene High Density Polyethylene (mHDPE) is a grade of polyethylene produced via the copolymerization of ethylene and alpha olefins in the presence of metallocene catalyst systems. In 2025, global metallocene LDPE production reached approximately 5,519K ton, with an average global market price of around USD 1,600 per ton. A factory gross profit of USD 400 per ton with 25% gross margin. A single line full machine capacity production is around 300K ton per line per year. downstream demand is concentrated in packaging, construction and healthcare. Carbonated soft drink screw cap uses mHDPE for superior Environmental Stress Crack Resistance (ESCR). This ensures the cap does not crack or leak due to the internal pressure of the CO<sub>2</sub> and the chemical nature of the beverage, ensuring a tight seal and safety. Asia Pacific is expected to remain the fastest-growing driven by rapid industrialization in China and India and increasing adoption of sustainable packaging.

United States market for Metallocene HDPE is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Metallocene HDPE is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
