The global Metaphosphate Glass market size is predicted to grow from US\$ 508 million in 2025 to US\$ 783 million in 2032; it is expected to grow at a CAGR of 6.4% from 2026 to 2032.

Metaphosphate glass is a class of phosphate-based glass primarily composed of long-chain polyphosphate units ($-PO_3^-$), typically formed from high-purity phosphorus pentoxide (P_2O_5) combined with alkali or alkaline-earth oxides such as sodium oxide (Na_2O), potassium oxide (K_2O), calcium oxide (CaO), or magnesium oxide (MgO), producing compositions like sodium metaphosphate or calcium metaphosphate glass; compared with silicate glass, it features lower melting temperatures, high thermal expansion, good rare-earth solubility, controllable chemical durability, and strong infrared transmission, making it suitable for laser host materials, bioresorbable medical glasses, sealing glasses, optical fibers, solid-state electrolytes, and specialty coatings. The supply chain begins upstream with phosphate rock mining → phosphoric acid production (wet or thermal process) → purification to electronic- or optical-grade P_2O_5 , alongside sourcing alkali carbonates, alkaline-earth oxides, and dopants (e.g., rare-earth oxides); midstream processing involves batch mixing, melting (typically 700–1,200°C depending on composition), refining, casting or fiber drawing, annealing, and precision finishing; downstream, metaphosphate glass is integrated into photonics (laser gain media, IR optics), biomedical implants (resorbable scaffolds), specialty sealing systems for electronics, and advanced energy or sensor applications, with value concentration highest in high-purity optical and rare-earth-doped laser-grade products. In 2025, global metaphosphate glass output totaled about 38,000 tons against 49,000 tons of capacity, with prices at USD 12,000–22,000 per ton and average gross margins near 33%.

United States market for Metaphosphate Glass is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
