The global Meter Reading Module market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

Wireless meter reading modules are divided into electric meter reading modules and other instrument meter reading modules in terms of power supply. The electric meter reading module has a higher degree of automation and a larger network scale, mainly because the electric meter reading module has a stable power supply and does not require node mode. Other instrument reading modules include water meter reading module, gas meter reading module, and heating meter reading module. These types of modules all require node modules to power batteries. They generally require three years of use, during which the batteries are not allowed to be replaced. Therefore, the network scale will be smaller.

United States market for Meter Reading Module is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Meter Reading Module is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Meter Reading Module is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
