MBS is a styrene - acrylic copolymer impact modified that provides a balance of clarity and resistance with outstanding strength and rigidity. MBS resin also has characteristics superior processing for demanding applications injection molding. Methyl methacrylate acrylonitrile butadiene styrene, or MBS, is a more recent modification of the SMMA copolymer, methyl methacrylate, acrylonitrile, butadiene and styrene. MBS is a polymer of methyl methacrylate butadiene styrene, created by modifying an acrylic styrene

SMMA with an impact modifier SBC . It is also known as an MBS or terpolymer, or a copolymer impact modified. Both materials are transparent and can be easily colored by adding liquid concentrates or colors. MBS key properties are excellent transparency, high impact resistance and good chemical resistance. This is an outstanding combination of properties for a thermoplastic impact - modified. MBS can be used to create brilliant visual effects such as very deep or sparkling colors, pearlescent effects. MBS is an optimal choice for exclusive and design - oriented applications.
