Methyl octabromo ether masterbatch is a highly efficient functional masterbatch containing methyl octabromo ether flame retardant, widely used for flame-retardant modification of polymers such as plastics and rubber. By uniformly dispersing the flame retardant into the base material, this masterbatch delivers excellent flame retardant performance while maintaining the physical and mechanical properties of the material during processing. With superior thermal and chemical stability, methyl octabromo ether masterbatch demonstrates outstanding reliability and durability in applications such as electronic and electrical housings, construction materials, and more. Additionally, it effectively minimizes dust issues associated with using powder flame retardants, enhancing production safety and environmental friendliness.
