The global Methylal market size is predicted to grow from US\$ 222 million in 2025 to US\$ 255 million in 2031; it is expected to grow at a CAGR of 2.3% from 2025 to 2031.

Methylal is manufactured by oxidizing methanol or through reaction of formaldehyde and methanol. It is a clear, colourless flammable liquid with a low boiling point, low viscosity, and excellent dissolving power. Methylal is soluble in water and miscible with most common organic solvents. It is therefore used primarily as a solvent in the manufacturing of resins, adhesives, paint strippers, and protective coatings.

The major players in global methylal market include Prefere Resins (INEOS), Kuraray, Lambiotte, etc. The top 3 players occupy about 50% shares of the global market. Europe and China are main markets, they occupy about 65% of the global market. Crude grade is the main type, with a share about 57%. Solvents is the main application, which holds a share about 54%.
