According to our LPI (LP Information) latest study, the global Micro-Encapsulation Fastening market size was valued at US\$ million in 2023. With growing demand in downstream market, the Micro-Encapsulation Fastening is forecast to a readjusted size of US\$ million by 2030 with a CAGR of % during review period.

The research report highlights the growth potential of the global Micro-Encapsulation Fastening market. Micro-Encapsulation Fastening are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Micro-Encapsulation Fastening. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Micro-Encapsulation Fastening market.

Micro-Encapsulation Fastening are used to solve vibration loosening problems on Bolts, nuts and other threaded fasteners, as well as leakage problems by applying sealants under the head of Screws and Bolts, replacing “O Rings” and/or gaskets and rubber washer. The pre-applied threadlocker of Micro-Encapsulation Fastening remains inactive until the coated fastener is assembled onto the mating part. During the assembly the micro capsules are ruptured, initiating the polymerization process, curing the assembly quickly at room temperature, providing reliable locking and immediate sealing properties to the assembly.

In the North America market, the major players of micro-encapsulation fastening include ND Industries, Würth Industrie Service, Bossard Group, Bradley Group and Nylok, etc.

The top five players account for about 10% of the market share. In terms of product type, bolts are the largest segment with 81 percent share, and in terms of applications, automobiles have the largest share with about 62 percent.
