Micro Mist Steamers Treat Damaged Hair More Effectively Than Regular Steam by Using Ultrasonic Vibrations to Release Large Quantities of Tiny Water Particles That Penetrate Deep into the Hair Follicle. This Creates a Sensation Often Referred to As Smoothness and Relaxation for Clients While Providing Effective Treatment for Hair Damaged by Perms and Coloring. After the Treatment, Cold Air is Blown to Enhance the Fixation of the Treatment Agent to the Hair Follicle. Depending on the Specific Needs of the Client and Hair, Easy-to-use Controls Give You the Flexibility to Control the Temperature, Mist Level and Duration As Well As the Pre-programmed Treatment.
