Micro-reactor, that is, micro-channel reactor, is a micro-reactor with a characteristic size between 10 and 300 microns (or 1000 microns) manufactured by precision processing technology. The 'micro' of the micro-reactor means that the channel of the process fluid is at the micron level. , Rather than referring to the small size of the micro-reaction equipment or the small output of the product. The micro-reactor can contain millions of micro-channels, so a very high output can be achieved.
