The global Microbiome Therapeutics market size is predicted to grow from US\$ 169 million in 2025 to US\$ 1246 million in 2031; it is expected to grow at a CAGR of 39.5% from 2025 to 2031.

The human microbiome is the collection of all the microorganisms living in association with the human body. These communities consist of a variety of microorganisms including eukaryotes, archaea, bacteria and viruses. Bacteria in an average human body number ten times more than human cells, for a total of about 1000 more genes than are present in the human genome. Because of their small size, however, microorganisms make up only about 1 to 3 percent of our body mass (that's 2 to 6 pounds of bacteria in a 200-pound adult).

These microbes are generally not harmful to us; in fact they are essential for maintaining health. For example, they produce some vitamins that we do not have the genes to make, break down our food to extract nutrients we need to survive, teach our immune systems how to recognize dangerous invaders and even produce helpful anti-inflammatory compounds that fight off other disease-causing microbes.

An ever-growing number of studies have demonstrated that changes in the composition of our microbiomes correlate with numerous disease states, raising the possibility that manipulation of these communities could be used to treat disease.

The Application of Microbiome Therapeutics includes CDI, IBD, Orphan Drug, Immunoncology and Others, and the proportion of R&D Investment for CDI is about 52%.

For Microbiome Therapeutics Pipeline Product, SER-109, ABI-H0731, ribaxamase, SYN-010 have the most investment in research, there are in Phase 3, PHASE 1b and Phase 2.

North American is the largest market, It occupy nearly 37% market share. Following North American, Europe is the second largest market with the consumption market share of 30%.

Market competition is not intense. Seres Therapeutics, Assembly Biosciences, Synthetic Biologics, Interxon and PureTech are the leading Developers in the industry, with about 60% market shares.
