The global Microwave Ovens market size is predicted to grow from US\$ 10480 million in 2025 to US\$ 12680 million in 2031; it is expected to grow at a CAGR of 3.2% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Microwave oven is a kitchen appliance that heats and cooks food by exposing it to electromagnetic radiation in the microwave frequency range. This induces polar molecules in the food to rotate and produce thermal energy in a process known as dielectric heating. Microwave ovens heat foods quickly and efficiently because excitation is fairly uniform in the outer 25?38 mm (1?1.5 inches) of a homogeneous, high water content food item; food is more evenly heated throughout than generally occurs in other cooking techniques.

Global Microwave Oven key players include Galanz, Midea, Electrolux, Whirlpool, Panasonic, etc. Global top five manufacturers hold a share about 65%. China is the largest market, with a share about 50%, followed by Europe, with a share about 15 percent. In terms of product, Under 1 Cu.Ft Type is the largest segment, with a share about 60%. And in terms of application, the largest application is Commercial Use, followed by Household Use, etc.
