The global Mine Ventilation Equipment market size is predicted to grow from US\$ 277 million in 2025 to US\$ 321 million in 2031; it is expected to grow at a CAGR of 2.5% from 2025 to 2031.

Ventilation is among the most important functions in a mining operation. Since ventilation directly affects the health and safety of employees working underground, mine owners take the regulation of air flow through a mine very seriously. Factors that determine ventilation design include: the type of mine, its location, the regulations around how much ventilation is required (varies by jurisdiction), and the equipment being used. The latter is especially important because a mine that uses diesel equipment will require more ventilation to dilute the diesel fumes than one that uses electric vehicles.

Asia-Pacific is the largest market with about 30% market share. Europe is follower, accounting for about 27% market share.

The key players are Howden, Epiroc, TLT-Turbo, ABB, ABC Industries, Twin City Fan?Blower, New York Blower, Zitron, ABC Ventilation Systems, Clemcorp Australia, ECE-COGEMACOUSTIC, Sibenergomash-BKZ, Hurley Ventilation, Parag Fans?Cooling Systems, Chicago Blower, Multi-Wing, Zibo Jinhe Fan, Spendrup FAN, Specialist Mechanical Engineers, Rotary Machine Equipment, AFS etc. Top 3 companies occupied about 26% market share.
