Coaxial cable is a kind of cable with copper conductor, insulator shield and braided metal mesh, which can prevent signal interference and crosstalk. The core copper conductor is used to transmit signals, and the insulator provides insulation for the copper conductor. The insulator is surrounded by braided metal conductors, which helps prevent interference and crosstalk of electrical signals. The entire setup is again coated with a protective plastic layer to provide additional security for the cable. This paper mainly studies the micro RF coaxial connector with the frequency of 500MHz - 300GHz.
