The global Mining Auxiliary Transportation Equipment market size is predicted to grow from US\$ 24270 million in 2025 to US\$ 32110 million in 2032; it is expected to grow at a CAGR of 4.2% from 2026 to 2032.

Mining auxiliary transportation equipment refers to all kinds of transportation except coal and ore products transportation in coal mine, metal mine and other production, including materials, equipment, personnel, gangue, etc.

The market is being primarily driven by the mining sector, which is rapidly expanding owing to the newly found resources in regions like Zambia and Congo. The increasing demand for precious metals, coal, and other metal and non-metal products is leading to increased mining activities in Indonesia, India, and China. The rapid growth of mining activities fuelled by the demand for underground resources is, in turn, increasing the demand for heavy mining equipment. Furthermore, the development of new mining locations is resulting in an increased demand for mining equipment. The rise in the levels of mineral output is also propelling the market growth. Coal mining is another crucial factor, pushing the market growth for heavy equipment further. Coal accounts for 40% share of the mining sector revenues. Further, the metal mining application segment is also supporting the market growth with the increasing demand for precious metals, favorable government policies, and a rise in hauling of metal deposits.
