Abstracts

miRNA drugs can be divided into miRNA Antagonist and miRNA Mimics. miRNA Antagonist can bind to miRNA in the principle of complementary base pairing and degrade miRNA through RISC to inhibit the function of miRNA. miRNA Mimics have similar functions to miRNAs in the human body, and introducing them into pathological cells can restore their normal physiological functions.

The global market for miRNA Drug is estimated to increase from US\$ million in 2021 to reach US\$ million by 2028, exhibiting a CAGR of % during 2022-2028. Keeping in mind the uncertainties of COVID-19 and Russia-Ukraine War, we are continuously tracking and evaluating the direct as well as the indirect influence of the pandemic on different end use sectors. These insights are included in the report as a major market contributor.

The APAC miRNA Drug market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.
