The global Mobile Drying System market size is predicted to grow from US\$ 1096 million in 2025 to US\$ 1714 million in 2032; it is expected to grow at a CAGR of 6.5% from 2026 to 2032.

Mobile agricultural drying systems are mobile devices specifically designed for drying agricultural products, primarily used for removing moisture from grain crops such as corn, wheat, rice, and seeds. This equipment can rapidly reduce the moisture content of crops after harvest, preventing mold, spoilage, and quality degradation, thereby improving the safety of grain storage. The system typically consists of a heating unit, an air circulation system, a drying chamber, and a mobile chassis, allowing for flexible movement between farms or grain storage sites. Mobile agricultural drying systems help improve the efficiency of post-harvest processing of agricultural products and reduce grain loss, making them important equipment for modern agricultural mechanization and grain storage management. The mobile agricultural drying system industry chain includes upstream core components such as steel structure materials, burners, heating systems, fans, sensors, and control units. The midstream involves equipment design, manufacturing, system assembly, and quality testing. Downstream applications mainly include farms, grain storage facilities, agricultural cooperatives, and grain processing enterprises. Supporting industries include equipment installation, maintenance services, spare parts supply, and agricultural machinery sales networks. In 2025, the global production of mobile agricultural drying systems was approximately 29,474 units, with a global average market price of approximately US\$38,000 per unit. The gross profit margin of major companies in the industry is approximately 20%-35%. The global production capacity of mobile agricultural drying systems is estimated at 39,000 units by 2025.

United States market for Mobile Drying System is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
