The World Trade Organization (WTO) and bilateral free trade agreements, such as the European Union Free Trade Agreement (FTA) and the North America Free Trade Agreement (NAFTA), have created opportunities for exporters in the U.S. and Europe to increase trade for perishable foods in a duty-free manner. The refrigerated storage market in developing economies is driven by a shift from carbohydrate-rich diets to protein-rich foods, owing to rising consumer awareness. Countries such as China are expected to portray a significant growth rate over the coming years due to a consumer-led economic transition. With growing technological advancements in warehouse management and refrigerated transportation, the market will likely expand in developing economies. Furthermore, several countries have strict regulations governing the transportation and storage of perishable food products to ensure food safety and quality. Compliance with these regulations often requires a robust cold chain system, which can be achieved with the help of ice machine systems.
