The global Mobile LNG Tanks market size is predicted to grow from US\$ 734 million in 2025 to US\$ 1305 million in 2032; it is expected to grow at a CAGR of 8.4% from 2026 to 2032.

A Mobile LNG Tank is a portable or transportable container designed for the safe storage and transportation of liquefied natural gas (LNG) at extremely low temperatures (typically around -162°C). These tanks are engineered to maintain LNG in its liquid state, minimize boil-off gas, and ensure safe handling during movement via road, rail, or sea. Mobile LNG tanks are widely used in remote LNG refueling stations, temporary storage sites, and LNG distribution networks. In 2025, global Mobile LNG Tank production reached approximately 6,255 units, with an average global market price of around US\$ 120,000 per unit. Annual production capacity is 6,500 units. Gross Profit Margin: 22.36%. The Mobile LNG Tank industry chain spans from upstream raw materials such as high-strength steel, aluminum alloys, and cryogenic insulation materials, to midstream manufacturing including tank fabrication, vacuum insulation, quality testing, and system integration, and finally to downstream sectors like LNG refueling stations, industrial storage sites, and regional LNG distribution networks. Leading manufacturers such as CIMC ENRIC, Cryo-Tech, and Kingtank play a critical role in integrating advanced cryogenic technologies, ensuring safety, and meeting regulatory standards, which strongly influences both product quality and market adoption. The Mobile LNG Tank market has significant growth potential driven by global LNG consumption increase, expanding transport and refueling infrastructure, and stricter environmental regulations. Companies that invest in high-efficiency insulation, modular designs, and smart monitoring systems will likely outperform competitors. While current production is around 6,255 units annually, rising demand in Asia-Pacific and Europe suggests a long-term opportunity for scalable manufacturing and regional customization, making this sector highly attractive for investors and industrial players alike.

United States market for Mobile LNG Tanks is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Mobile LNG Tanks is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
