The global Mobile Phone Charging Head market size is predicted to grow from US\$ 4622 million in 2025 to US\$ 6498 million in 2032; it is expected to grow at a CAGR of 5.1% from 2026 to 2032.

The mobile phone charging head is a component that connects the mobile phone charging cable and the power socket. It usually consists of a plug part and a USB interface or other connection interface. The plug part is designed to match the power socket, while the interface part is used to connect the charging cable, usually using a USB interface. Charging heads usually have a compact and lightweight design, making them easy to carry and use. Some also have functions such as fast charging, intelligent identification of device charging needs, and overload protection to improve charging efficiency and safety.

Mobile phone charging heads are essential accessories for mobile devices, with a growing market driven by the widespread adoption of smartphones and rapid advancements in fast charging technologies. The industry comprises both brand owners and ODM/OEM manufacturers. Leading ODM/OEM players such as AOHAi, Salcomp, Flex, Lite-On, and Artesyn demonstrate strong capabilities in technological innovation, production capacity, and supply chain management, supporting diverse fast-charging protocols (e.g., USB PD, QC, PPS) and various power levels. Brands like Anker, UGREEN, and Baseus enhance market penetration and consumer awareness through branding and channel expansion.

The upstream supply chain includes core electronic components and emerging semiconductor materials such as gallium nitride (GaN), with technological upgrades driving performance and size optimization. The midstream manufacturing focuses on

precision processes and quality assurance to ensure product safety and compatibility. Downstream channels cover online e-commerce, offline retail, and OEM brand partnerships, offering diverse sales models. Going forward, with the widespread adoption of GaN technology, intelligent charging management, and rising energy efficiency demands, the mobile phone charging head market is expected to trend toward higher-end and diversified products, with competition increasingly shaped by brand strength and technological innovation.
