The global Mobile Phone Precision Connector market size is predicted to grow from US$ million in 2025 to US$ million in 2031; it is expected to grow at a CAGR of %from 2025 to 2031.

Mobile phone connectors are important electronic components in mobile phones, and their quality directly affects the quality and reliability of the phone. The vast majority of after-sales quality issues with mobile phones are also related to connectors. The types of connectors used in mobile phones vary slightly depending on their products.

The global connector market size in 2020 was approximately $62.7 billion, a decrease of 2% compared to 2019. The Chinese market is the world's largest market, with a market size of approximately $20.2 billion, accounting for approximately 32%. The Chinese market is also the only market to achieve positive growth in 2020, with a growth rate of 4% compared to 2019. However, the growth of the Chinese market was offset by the decline in other markets. Although the Chinese market grew by approximately $700 million, the global market declined by approximately $2.1 billion, ultimately resulting in a global market decline of approximately $1.4 billion.
