The report requires updating with new data and is sent in 48 hours after order is placed.

According to our LPI (LP Information) latest study, the global Mobile Remittance Service market size was valued at US\$ 6192.7 million in 2023. With growing demand in downstream market, the Mobile Remittance Service is forecast to a readjusted size of US\$ 9132 million by 2030 with a CAGR of 5.7% during review period.

The research report highlights the growth potential of the global Mobile Remittance Service market. Mobile Remittance Service are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Mobile Remittance Service. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Mobile Remittance Service market.

Around 400 million of the two billion unbanked people in the world have some forms of mobile money account. The global remittance revenue generated from digital channels is estimated to be less than 6% of the total but is progressively growing. However, a predominant endto-end digital scenario is still some time off.

The growth of the digital remittance market is driven by rise in digitization & automation, reduced remittance cost & transfer time, and growth in adoption of banking & financial services. Furthermore, regulatory initiatives that encourage all financial institutions to become more transparent and nurture richer ecosystems of data & partners supplement the market growth. However, lack of awareness & guidance is a major factor that restrains people from opting for digital remittance transfer mode. Increase in access of

financial services such as basic bank accounts among remittance recipients and rise in internet usage offer growth opportunities for the market.
