The global Mobile Smart Screen market size is predicted to grow from US\$ 2777 million in 2025 to US\$ 5030 million in 2032; it is expected to grow at a CAGR of 8.4% from 2026 to 2032.

In 2025, the global production volume of mobile smart screens reached 8.112 million units, with an average selling price of 3,500 USD per unit. The global annual production capacity of mobile smart screens is approximately 12 million units, and the gross profit margin is around 30.7%. A mobile smart screen is a portable display device with intelligent functions, combining large-screen display, multimedia interaction, and communication capabilities, and is widely used in scenarios such as business, advertising, education, and conferencing. It differs from traditional fixed displays by offering greater flexibility and mobility. The upstream of mobile smart screens includes IPS-LCD panels, touch sensors, main control chips, and others. The midstream consists of mobile smart screen manufacturers, while the downstream mainly covers industries such as education, office, and entertainment.

The current market for mobile smart screens is in a rapidly growing emerging stage, primarily benefiting from the continued rise in demand for flexible interactive display devices in scenarios such as remote work, online education, and digital presentations. As a new type of terminal that combines large-screen display, intelligent interaction, and portable mobility, the mobile smart screen is gradually penetrating areas such as home, business, and public services, owing to its advantages of being usable anytime and anywhere, convenient operation, and adaptability to multiple scenarios. With the continuous maturation of technologies such as wireless screen casting, voice control, and AI-assisted functions, users are placing higher expectations on product experience and integration, driving products toward thinner, smarter, and longer-battery-life designs. Overall, this market is in a rapid development phase driven by both demand and technological empowerment.
