Modified bitumen adhesive is a type of adhesive specifically designed for the installation of modified bitumen roofing systems. Modified bitumen roofing is a durable and flexible roofing material composed of asphalt/bitumen, reinforced with various materials like fiberglass or polyester. The adhesive is used to bond the modified bitumen sheets to the roof substrate or other layers of the roofing system. It is typically a solvent-based adhesive that provides a strong and secure bond between the roofing materials. The adhesive is applied to the surface using a trowel, allowing for proper adhesion and creating a watertight seal. Modified bitumen adhesive is often used in commercial and residential roofing applications and provides excellent resistance to extreme

temperatures, UV radiation, and foot traffic.
