The global Modified NSAIDs market size is predicted to grow from US\$ 7169 million in 2025 to US\$ 12144 million in 2032; it is expected to grow at a CAGR of 8.3% from 2026 to 2032.

Modified nonsteroidal anti-inflammatory drugs (NSAIDs) are drugs developed from traditional NSAIDs (such as ibuprofen, indomethacin, and diclofenac) through molecular structure modification, improved formulation processes, or combination therapy strategies to reduce side effects and improve safety and efficacy. The main side effects of traditional NSAIDs are gastrointestinal damage, cardiovascular risk, and kidney impairment. Modified NSAIDs significantly reduce these risks and improve long-term safety through structural or formulation innovations. The product is priced at approximately \$5,000 per kg, with global sales of approximately 1.46 million kg.

The upstream sector consists of active pharmaceutical ingredients (COX inhibitors, synthetic intermediates); the midstream sector comprises modified formulation companies (controlled-release tablets, transdermal patches, and combination formulations); and the downstream sector includes hospitals, pharmacies, and the OTC market. Future trends are safety-driven: selective COX-2 inhibitors and novel formulations will gradually replace traditional NSAIDs, especially in the elderly and patients with chronic diseases. Precision medicine and biologics will also become complementary treatment options.

United States market for Modified NSAIDs is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Modified NSAIDs is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Modified NSAIDs is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Global key Modified NSAIDs players cover Pfizer, Novartis, Bayer, AbbVie, Takeda, etc. In terms of revenue, the global two largest companies occupied for a share nearly % in 2025.
