The modified sine wave is relative to the sine wave, and the output waveform of the mainstream inverter is the modified sine wave. The waveform of the inverter is mainly divided into two categories, one is a sine wave inverter (that is, a pure sine wave inverter), and the other is a square wave inverter. The output of the sine wave inverter is the same or better sine wave AC power as the grid we use daily, because it does not have electromagnetic pollution in the grid.

The global Modified Sine Wave Inverters market size is projected to grow from US\$ million in 2023 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
