## Abstracts

The global Modular Battery Rack market size is predicted to grow from US\$ 1225 million in 2025 to US\$ 2222 million in 2032; it is expected to grow at a CAGR of 8.9% from 2026 to 2032.

A Modular Battery Rack is a standardized framework or housing system designed to hold multiple battery modules in a scalable and flexible configuration. It allows easy installation, replacement, and expansion of batteries, ensuring efficient power management, cooling, and safety. These racks are commonly used in energy storage systems, data centers, electric vehicles, and industrial applications. In 2025, global modular battery rack production reached approximately 313,090 units, with an average global market price of around US\$ 4,000 per unit. Annual production capacity is 385,000 units. Gross Profit Margin: 25%. The modular battery rack industry chain involves upstream, midstream, and downstream segments. Upstream includes raw materials such as steel, aluminum, and electronic components for battery management systems (BMS). Midstream focuses on the design and manufacturing of the racks themselves, including modular structures, enclosures, and integration capabilities. Downstream encompasses energy storage system providers, data centers, telecom operators, and industrial UPS manufacturers who purchase these racks to house and manage battery modules. The industry's growth is closely tied to global demand for renewable energy storage, data center expansion, and telecom infrastructure modernization. Modular battery racks represent a critical but often overlooked component in the clean energy transition. While batteries themselves receive most attention, the racks ensure safety, scalability, and maintainability. The growing trend toward modularity and standardization will favor manufacturers who can deliver flexible, high-quality racks compatible with various battery chemistries. In the long term, innovation in materials, thermal management, and intelligent integration will differentiate

leading players in this market.
