## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Modular data center solutions are installed on the floor like traditional data center but it saves lots of space because of its all-in-one design. Each component of the data center is an independent enclosed space, which contains air-conditioning, PDU equipment and fire-fighting equipment. The vendor will design and manufacture the components as per the client's preapproval in their factory. Modular data centers(MDC) may be based on components of modular blocks, pre-assembled and factory tested and provide a scalable solution and a delivery time that is shorter than in traditional brick and mortar construction.
