Gripper is a tool mounted on the equipment to grip work pieces. By opening and closing the fingers powered by electric or pneumatic power, the gripper grips and releases work pieces. Electric gripper and pneumatic gripper are two different types of gripper both widely used in various automation applications. Compared with pneumatic gripper, electric gripper are more cleaner grippers, need no air lines and save on power and maintenance, and electric gripper is more suitable to be used for detect grip.

The industry's leading producers are SCHUNK, SMC and IAI, which accounted for 16.53 percent, 12.58 percent and 10.30 percent of revenue in 2019, respectively.
