A modular vise is a type of workholding device used in various industrial settings, such as metalworking, woodworking, and assembly lines, to securely hold workpieces in place during operations like drilling, sawing, and shaping. Unlike traditional vises that have fixed jaws, a modular vise features interchangeable jaws or components that can be adjusted or replaced to accommodate different sizes and shapes of workpieces. This versatility makes modular vises ideal for tasks that require frequent changes in the type of material being worked on or the size of the workpiece.
