## Abstracts

The global Modularized LNG market size is predicted to grow from US\$ 1222 million in 2025 to US\$ 2033 million in 2032; it is expected to grow at a CAGR of 7.6% from 2026 to 2032.

Modularized LNG refers to the engineering, procurement, and construction (EPC) approach where Liquefied Natural Gas facilities are broken down into self-contained, pre-fabricated sections called 'modules.'

Instead of traditional 'stick-building' (welding every pipe and beam on-site), these modules are built in controlled off-site fabrication yards (often shipyards), transported via heavy-lift ships or barges, and assembled like giant building blocks at the final project site. This method drastically reduces construction time, improves safety, and cuts costs by avoiding remote-site weather delays and labor shortages.

United States market for Modularized LNG is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Modularized LNG is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
