Abstracts

The global Moisturizing Bar Soap market size is predicted to grow from US\$ 119 million in 2025 to US\$ 200 million in 2032; it is expected to grow at a CAGR of 7.9% from 2026 to 2032.

Moisturizing Bar Soap is a product designed for daily skin care, especially for people with dry or sensitive skin. It not only effectively cleanses the skin, but also provides essential moisturizing ingredients to help maintain the skin's healthy state.

The growth of moisturizing bar soaps is primarily driven by consumers' evolving demand for gentle cleansing and skincare. With rising skincare awareness, consumers are no longer content with basic cleansing; instead, they seek to maintain the skin barrier and maintain moisture balance while cleansing, particularly for those with dry and sensitive skin. The addition of natural moisturizing ingredients and innovative soap-free, low-irritation formulas have enabled moisturizing bar soaps to reduce post-wash tightness, making them suitable for use in all seasons, especially in dry environments. Furthermore, consumers' preference for natural and sustainable ingredients has further driven the popularity and upgrade of moisturizing bar soaps in the personal care market.
